## A Prognostication.

**F**Or the hearing, and determining of all Contradictions, Discords, and such like matters in the Common-wealth, these 4. times commonly called the *Termes*, be appointed, in which the learned Iudges set an end of contention, & debate, between party & party. Every of these 4. *Termes*, consists of 4, 5, or 6. *Returnes*, and every returne of foure dayes, and every day serving unto a severall purpose.

Note then, that every *Terme* hath part of these 6. kinde of *Returnes*, viz. *Crastino*, *Octabis*, *Quind*, *Tres*, *Mense* & *Quino*. *Crastino*, is the Morrow after the *Basis*, or day nominated: as *Crastino Trinitatis*, is the morrow after Trinity Sunday, it being the *Basis*, and that day gives the denomination. *Octabis* is 8. dayes after inclusively. *Quin*: is 15. dayes after, *Tres* that day 3 weekes *Mense* that day Moneth, and *Quinq*; that day five weekes.

Now every of these *Returnes*, hath 4. severall dayes, whereof they consist: the first whereof hath a double signification, the one is the day of *Returne*, and the other the day of *Essoyne* for the Defendant, in a personall action, or the Tenant in a real action, to be *Essoyned*. The second, is the day of *Exception*, for the Plaintiffe or defendant to lay an *Exception*, if no *Essoyne* bee cast, that the Defendant shall not bee *Essoynd*, or *Amerced*. The 3. is *Returna Brevium*, that is, the day whereon the Sheriff must returne the *Writ*. The 4. is the day of Appearance for Parties, and Jurors in the Court of *Common Pleas*.

If any of these dayes fall upon an Holy-day, that is no Court day, as in *Hillary Terme*, upon the day of *Purification*: In *Eastler Terme*, upon *Ascension* day; In *Trinity Terme*, upon the Nativity of Saint Iohn Baptist; And in *Michaelmas Terme*, upon the day of *All-Saints*, or upon any Sunday (all which, bee no Court dayes) then must the next day following serve for both, as if the *Essoyne* day fall upon Sunday, then Munday must serve for the *Essoyne* day, and also the day of *Exception*.

These dayes have all most use in Court of *Common Pleas*. But *Latitats*, or other Proces upon a Bill certaine, it is upon a day certaine: As *Die iura proxime Parit*: which must always be reckoned from the *Essoyne* day.

# Wood-house. 1643.

In the Chancerie, Court of Wards, and Court of Requests, they use none of these Returnes, but onely the day of Appearance, which is *Quarto Die post*.

Yet note well, that it a *Capias*, *Exigent*, *Scire facias*, or a *Distingas* be executed after the day of Essoyne, by the Sheriffe of a Comission late upon out of any the aforesaid Courts, after the said Essoyne day, it is neither justifiable, nor warrantable.

## The Law-dayes in the Court of Arches, Prerogative, Consistory in S. Pauls, Dele- gates, & Admirall Court, as they be usually kept in the Terme-time.

In Hilary Terme { St. Hilary, 13 } of January

## A Prognostication.

**T**He first day after every of these Feasts set downe for every Terme the Court of the *Arches* is kept in the forenoone in *Bow Church*. And the *Admiralls* Court the same day in the afternoone.

The second day after every of the sayd Feasts, the *Audience* Court is kept in the forenoone in the Consistory in *Saint Pauls*, and the *Prerogative* Court in the same place, in the afternoone. The 3. day following every of the sayd Feasts, the Bishop of *London* his *Consistory* Court is holden in *Saint Pauls* in the forenoone, and his Majesties Court of *Delegates*, in the same place in the afternoone. The fourth day following the sayd Feasts, his Majesties Court of *High Commission*, was wont to be kept in the *Consistory* in *Saint Pauls*, or at *Lambeth*, on Thursday afternoone, but now by Parliament with Star Chamber and Court of honor put down. But if any of the dayes before recited be Sunday, or an holy day, then is such Court kept the day following.

In *Hilary Terme*, 4. of the above named Court dayes, bee ordinarily kept, and as many in *Easter* and *Trinity Termes*: according to the course of the yeare, as the Iudge of the *Arches* in his discretion shall think good, who at the end of every Terme appoynteth the Court dayes to be kept in the next Terme, but in *Michaelmas Terme*, the Court dayes (if they be not altered) were wont certainly to be kept.

My advise therefore to all Country-men is (especially those that dwell farre off) being cited by any originall processe to appear in the *Arches*, *Audience*, *Prerogative*, or *Delegates*, to send to some Proctor, a note of the cause, and to what Court they be cyted, to appeare for them, and to returne them word of the very Day in which it shall be needfull for them to appeare in person. But in the course of practise in the *Admiralls Court*, it is otherwise, for every person then cited to those Courts, must appeare personally. A legall day is from Sun-rising to Sun setting: A man bound may refuse to wait any longer, to tender his money th en till the Sun set: For Indictments the day is accounted from midnight to midnight.

## Wood-houle 1643.

Generall Observations, and profitable to be regarded.

**R**emoue, and set young **Trees**, from October untill February, setting alwayes that side towards the Sunne, which was before, the Wind being Southerly, or West, the weather warme, dry, and at new Moone.

**Graft** and plant **Trees**, the Moone being new, in Taurus, Virgo, Capricorne, in faire, dry weather, the wind, S. or west.

**Cut** vines in December, or Ianuary.

**fell** timber to continue, and to avoid **Wormes**, in December, or Ianuary, 2, or 3. dayes before the Moone change.

**But** if you will haue it to grow againe, in the new Moone is best.

**Cut** hedges betwene the change and full Moone, from the first of Ianuary, untill May.

**Sheare** **Sheep**, cut hayze, and sow all manner of **Cozne** in the new of the Moone.

**Set** and **Sow** all kinde of **Seeds**, the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricorne, Aquarius, or Pisces, but for **Seeds** whose roots be round they should be sowne or set 3 or 4. dayes before or after a full Moone.

**Dung** land that weeds may not abound, in the last quarter

**feld** or **lib** cattell, the Moone in Aries, Libra, or Sagitarius, after a full Moone: but you may let them bleed at any time, the signe not being in the heart, nor in the place where the iustion is to be made, nor in the day of the Moones change.

**Gather** **flowers**, or **Seeds** such as you minde to keep all the yeare at the full Moone. Dry them in the shade till they be almost dry, and then sunne them a little lest they mould, or corrupt, (if they will endure the beames of the Sun.)

**Gather** **Apples**, and **Mardens**, in the last quarter of the Moone; lay euery sort by it selfe without any fallings among them vpon the bare woods or plastered floore, untill the end of Novem. (the thinner the better they lye,) let the place be shut close in frosty cold weather, then cover them ouer with straw, hay, or barly chaffe, will not be amisse: but **Mardens** so gathered, and layd on dry boards, need not any covering.

## Generall Rules of Physick.

**O**pen no veine when the signe is in any place where the Incision is to be made, neither when the ☉ or are affected with malignant Planets, ♀ or ♂, let it be done in the morning after ☉ rising (the Patient fasting) if in the afternoon then after perfect digestion, the ayre temperate.

In letting of blood, the Physitian or Chyrurgian must be carefull of his Patient, for many times the careless and unlearn'd, by the letting of blood open a way too dangerous diseases and sometimes present death: observe therefore it is not convenient that a leane man or woman, or a child be let blood: And it is to be considered with the patient inwardly for his complexion, age for the time of the yeare and time of the day: Therefore it is best to let blood in faire temperate Sunshining weather, but not presently after it, nor sit violently & eat moderately.

Let blood the sanguine the ♀ being in ☉ or ♀, for the melancholy in ♀ or ♀, for the Plagmatick in ♀ or ♀.

For diseases the Phrenzy, Pestilence, Squinancy and Apoplexy, Plurisy, continuall Headach, hot burning feaver or any extreme paine or dangerous disease, then remedie must be presently sought for, with all convenient speed, but blood must not be then taken in such quantity.

November.

**M**ake Malt. Kill Hogs. Trench gardens with dung. Set Crabtree stocks. Sow Wheat, and Rye, in exceeding hot sandy grounds. Cut down timber for Plowes, Carts and other Implements for husbandry: Use who some meate, and drinke, with good exercise to preserve health.

December.

**I**f this and the next Moneth cut downe great timber in the last quarter of the Moone. Uncover the rootes of fruit Trees. Set Beanes, and Pease. Cover all your best flowers and hearbes from frosts and stormes, with old rotten horse dung. Look well to your cattell. Water and keep moist your meddowes. Let horses bloud. And (to conclude) Drink good Wine, and strong drinke. Keepe thy body warme clad thy house warme and dry. Banish all cares from thy heart and feast thy poore neighbours reioycing that God sent him so early begotten. Hon about this time into the world so saue all such that lay held on him with a true and lively faith.

Bones 247. Veins 365. Teeth 12.

### Profitable Rules for Gardning.

- 1 In the Southern parts near the Sea, gardening may be more timely than then Northward and in the midst of the land where the ayre is not so warm and favorable.
- 2 In setting hearbs leave no more top more than a handfull above the ground, nor more than a foot deep in the earth.
- 3 Twin the roots of those slips you set if they will abide it, but Silly flowers are too tender.
- 4 Set always in moyst weather and sow in dry weather.
- 5 Set Slips at any time except about Midsummer or in any frost.
- 6 Seeding spoyle the most roots by drawing sap from them.
- 7 Gather for the pot and medicines tender and green in the sap being in top, but in winter the root is best.
- 8 All hearbs except Rosemary ought to be removed once a yere.
- 9 These require great plots, Brichoke, Turnips, Calbedges, Parsnips, Onions, Carrots. Sa ron, Shirret, Licorice, Parsley, Spinnage, Radish, &c.
- 10 Gather all your seeds dead ripe and dry.
- 11 Lay no dung to the roots of the hearbs, for dung not well rotted is too hot even for trees also.
- 12 Thin setting and blowing, so that the roots stand not above a foot distance is profitable for the hearbs will like it better, and greater hearbs require more distance.
- 13 Set and sow hearbs in the time of their growth, except about Midsummer, for then they are too tender, but trees always in the time of their rest.
- 14 A good huswife may and will gather hearbs for the pot about Lammas, and dry and pound them, which in winter will do her good service.
